The bills were not put through without some few hitches; there were small tiffs which gave spice to the last working session of the term. In the Committee of Conference, which had two short meetings, all was peace and harmony. In the Upper House when the report of the Conference Committee was read there was a demand on the part of for the passage. Senator Crabbe that the bills be read by items, which consumed the better part of an hour, and in the House there was a little draught of "hot air" which stewed Emmeluth and Makekau for a few moments, to the intense amuse ment of the members.

There were a few changes made in the bills and these change the totals Now the bills carry a grand total of \$5,673,344. This is divided; Salaries, \$2,149,813.50; current expenditures. \$3,523,530,50. While this total seems to be extra large there may be made bills referred to: some slight change in the meaning conveyed by these figures by an amendment which was tacked onto the current expense bill. This sets forth that should there be a loan bill passed before the close of the current fiscal period, all items of the appropriations which came from the loan bills sent in by the Governor may be put back into the loan bill. This is taken to mean an anticipation of the probable action of President McKinley upon the power of the present Territorial Government to issue \$799,000 of bonds under the old loan law. sald bonds not having been issued owing to the payment of the appropriations under the bill out of the current funds. The matter was presented to the chief executive of the nation early in May, and an answer is looked for at any time now. A favorable response may mean an entire upsetting of all the plans of both the majority and those Republicans who are working with them to force an extra session. With unt of leeway there will little trouble in keeping the expenditures In the Senate the rending of this mesernor is through with the bill.

NEW YORK, July 9.-Comptroller of the Currency Dawes is quoted by the Washington correspondent of the Press s saying relative to the condition of he national banks of the country;

The latest detailed reports received from the national banks of the United States indicate an unusually high degree of prosperity. The condition of the national banking system can be taken as a practical barometer of the industrial and commercial condition of the country generally and therefore the remarkable showing now being made by these institutions indicates clearly that every branch of American trade and industry is flushed to a correspond-"The resources of the banks are great-

The present condition of the banks stands out in strong contrast against the dark background of the condition that prevailed some seven or eight years In 1893, for instance, the record for bank failures was reached, when thirty-eight of the national banks went permanently into the hands of receivers. During the first six months of the present year only seven banks have falled, while during the entire year of 1900 only five went under.

TERMS OF THE ROYAL OATH

NEW YORK, July 9 .- On consideration of the committee's report on the transubstantiation declaration in the House of Lords last night, says the Tribune's London correspondent, the Archbishop of Canterbury complained that the Episcopai bench had no voice in amending the declaration, and moved its reference back to the committee and the appointment of two additional members. Earl Grey declared that the revised form was even more offensive than the original. The Lord Chancellor denied this, his opinion being that evtion among society folk for the Galitzin erything objectionable had been struck out. Lord Lanff thought that the committee missed a great opportunity of removing an ancient grievance.
